

Catch-up vaccination for HPV vaccine

The following individuals are eligible to receive the human papilloma virus (HPV) vaccine for the prevention of cervical cancer **free of charge**.

Eligible individuals

Females born between April 2, 1997, and April 1, 2006, who have not completed a total of three doses of HPV vaccine in the past.

Vaccination method

Check the notification for specific vaccination procedures from the municipality where you are registered. Depending on the number of doses and timing of past vaccinations, the vaccination method may vary.

Consult with your municipality or medical institution.
