

Campus Alert

A sharp increase in heatstroke cases has been reported on campus!

Have you checked today's heat risk?

Follow Gifu University's real-time Wet Bulb Globe Temperature (WBGT) index and adjust your activities accordingly.

Since July, temperatures have risen sharply, and the number of students suffering from heatstroke on campus has increased dramatically.

You can check Gifu University's real-time Wet Bulb Globe Temperature (WBGT) index and its trends to help you stay safe.

【Today's WBGT (Wet Bulb Globe Temperature) Trend on the Gifu University Campus】

Center for Collaborative Study with the Community, Institute
for Advanced Study, Gifu University

【Criteria for Issuing a Heat Stroke Alert】

WBGT	>35	Special heat stroke warning
	>33	Heat stroke alert
	>31	Danger : exercise prohibited
	28~31	Severe warning : heavy exercise prohibited
	25~28	Warning : rests should be provided often
	<25	Caution : water should be replenished often

Check the campus WBGT before you start!
Cancel • Modify • Postpone
Outdoor activities if the heat risk is high.

Cancel
Stop the activity!

Modify
Move the activity indoors!

Postpone
Shift the activity to a cooler day or time!

Did you know!? Cool Campus Spots!

Taking regular breaks and cooling down are key to preventing heatstroke. Here are the "Cool Campus Spots" at Gifu University where you can take a break and cool off.

Use the map to find these spots and stay safe throughout the summer!
